In addition, offsetting your carbon footprint can deliver a huge array of positive social, economic and environmental benefits.

An Imperial College University Study shows that for every 1 tonne of CO$_2$ emission removed from the atmosphere through a carbon offset programme - a further value of US$664 dollars is delivered in economic, social and environmental benefits for local communities around the world. Once again, what value is gained?

For every tonne of CO$_2$ you offset, you will pay for 1 tonne of CO$_2$ reduced - independently verified.

Helping tackle climate change

In addition, offsetting your carbon footprint can deliver a huge array of positive social, economic and environmental benefits.

A number of offset buyers have highlighted the following business benefits:

- Social Impact: 47%
- Economic Impact: 48%
- Environmental Impact: 47%
- Employee Engagement: 37%
- Market Differentiation: 15%
- Supply Chain Management: 4%
- Philanthropy: 4%
- Efficiency: 4%
- Reputation / Brand Image: 47%
